

QUALITY

XXL® Cinch Caps

Locking cap for RCA connections

High-quality cinch caps for hi-fi components with 24-carat gold-plated external finish and special coating on the inside. Thanks to the integrated special-coating, the caps are able to guarantee highest levels of protection against interference. This means that high-frequency radiation is reliably prevented from penetrating the device, which in turn results in an audible improvement in music reproduction. The devices' inputs and outputs are also perfectly protected against corrosion.

Features

- ✓ Good protection against corrosion
- ✓ Eliminates HF radiation
- ✓ 24-carat gold-plated finish
