ABOUT NHT

NHT (Now Hear This) was founded by Chris Byrne and Ken Kantor in December 1986 and we are famous for our premium sealed speakers ranging from the Model 1 in the 1980s to our acclaimed C Series speakers and Dolby Atmos speakers today.

"NHT speakers look great, sound great, and measure superbly.

- Jay Haider, reviewer

PREMIUM AUDIO

Developed in Benicia, CA

C SERIES

The C SERIES represents a fresh look at our best audio series of speakers. It takes the best of our Classic line and adds subtle sonic improvements to each of the models.

Music reproduction is what you would expect from NHT: incredible detail, powerful dynamics, and pinpoint imaging. Home theater benefits from high output along with friendly room and placement designs.

COLLECTION

C 4 Tower

The C-4 is perfect for a stand alone music system and has the capacity to play louder than its predecessor, the Classic Four, in a home theater system.

C 1 Bookshelf

What this means is that the C-1 makes a terrific stand-alone music speaker for small rooms but with enough dynamic range for a surround system.

C 3 Bookshelf

C-3 carries on the tradition of our best bookshelf design providing an even wider soundstage, excellent dispersion, and even more detail.

C LCR Center

A 3-way center speaker offers tremendous benefits, notably providing broad dispersion in both horizontal and vertical planes and greatly improved intelligibility throughout the seating area.

MEDIA SERIES

NHT's Dolby licensed, MEDIA SERIES is designed to provide great audio for both music and film without dominating your room.

Spatial efficiency is key for the MEDIA SERIES; each model is as low profile as we can make it, with the height speakers built right into the cabinet, minimizing the total number of speakers in your room without sacrificing sonic capability.

COLLECTION

MS Tower

The MS - Tower is a 3-way, acoustic suspension tower loudspeaker with high output, full-range dynamics and broad dispersion supporting Dolby Atmos.

MS Satellite

MS - Satellite is a compact, 2-way satellite showcasing a built-in up-firing driver for Dolby Atmos® channels. The low profile design is ideal for wall mounting but also functions equally well on a TV stand or shelf.

Atmos Mini

Enhance your existing speaker system with Dolby Atmos® by utilizing the AFX Mini, a small add-on speaker comprised solely of an up firing driver.

MS Center

The MS - Center channel speaker uses the same 1" tweeter and 5.25" woofers utilized in the rest of the Media Series with a slimmer profile that can be easily mounted flush against the wall either above or below a TV or placed on tabletop or shelf.

SUPER SERIES

Designed for audiophiles on a budget, the SUPER SERIES offers the ultimate in value without compromise to sonic performance. The Super Series provides all the detail and air you would expect from speakers of the highest caliber.

Each model is solidly built using economies of scale to keep the price affordable for all consumers. With extensive attention to design and voicing, there is no reason that you have to pay more to truly enjoy music.

COLLECTION

Super One

The 2nd generation of NHT's second most popular speaker ever. The SuperOne2.1 is very compact and has the same breathtaking sonics as our SuperZero with added bass.

Super Center

Affordable high-performance NHT home theater is easier than ever with the SuperCenter 2.1. This attractive center channel speaker is a perfect match for the SuperZero or SuperOne.

With a 2-way, acoustic suspension design using two 4.5" drivers (same as the SuperZero and SuperPower) and a 1" silk dome tweeter, the SuperCenter is voiced identically to other products in the Super Series, for a seamless tonal balance.

Super Zero

The SuperZero 2.1 is a true high-end mini-monitor with a compact, well-braced cabinet coated with a beautiful black gloss laminate with easy wall & ceiling mounting options available.

ARCHITECT SERIES

The ARCHITECT SERIES is NHT's collection of remarkable and invisible in-wall, in-ceiling and Outdoor speakers that are perfect for background, foreground, home theater and distributed audio in your home or business.

NHT's patented three tweeter array provides flat response up to 60 degrees off axis, which eliminates "hot-spots" and "not-spots". Architect models are also moisture and humidity resistant.

COLLECTION

IC4 - ARC

The iC4-ARC is NHT's super-premium 8" woofer in-ceiling speaker. iC4-ARCs can also be used in any situation where the very best sound reproduction is desired with almost no physical presence in the room.

IC3 - ARC

iC3-ARC in-ceiling speakers are ideally used for premium multi-room audio, as home theater speakers for any channel, in office commercial venues or anywhere you want affordable high-end sound hidden from view.

IW4 - ARC

The iW4-ARC is our powerhouse architectural product. Outrageous dynamics, terrific bass, high output are present in the iW4-ARC with no loss in detail

AIW - ARC

The AiW-ARC is a high-performance, compact in-wall speaker that utilizes a number of NHT technologies in tandem to deliver sound quality well beyond your expectations.

SUBWOOFERS

NHT has been making sealed, powered subwoofer speakers for a long time.

Let general room size and how much bass you desire determine which subwoofer system is best for you. It is important to remember that sometimes two subwoofers are a viable option.

Each sub is powered using IcePower amplifiers and hand assembled using the best materials.

COLLECTION

CS 10

The CS-10 is a 300W, 10" long throw, powered subwoofer housed in a 14" square cabinet. The result is the smallest possible subwoofer that retains NHT's signature musical qualities.

SS 10

The SS-10 Subwoofer is the perfect compact subwoofer for our Super Series speakers. We upgraded the original Super 8 model by substituting the former 8" driver with a 10" and a 250W amplifier, effectively doubling the power of its predecessor.

PERSONAL AND OTHER PRODUCTS

NHT makes plenty of other critically acclaimed products.

These range from outdoor speakers to wireless earbuds and even custom made products.

With specialized silk drivers to ARC materials and even custom drivers, each NHT product is made with you in mind.

COLLECTION

TWS Earbuds

NHT's 0.2 wireless earbuds feature an industry leading proprietary 6mm driver, IPX6 water resistance, and BT5.0 SBC and AAC codec support for an exceptional listening experience.

O2 Outdoor

The O2-ARC is a unique, high-performance outdoor loudspeaker that is weather (UV) and moisture resistant, and includes a mounting bracket.

M 7 Custom LCR

The M7 is 3-way monitor, employing two, long throw, 6.5" cast frame woofers with under-hung voice coils, a four" mid-range and a 1" aluminum dome tweeter. We designed the M7 for larger media rooms where high output is required. The cabinet is made from $\frac{3}{4}$ " MDF, heavily braced internally to avoid audible resonances.

Assembly takes place in sunny California. Every M7 is subjected to a battery of tests and within a tight window to insure that the speakers match sonically. Super clean, accurate and low distortion to bring you every detail in film tracks or music.
