

# Dynavoice Challenger M-105

Powerful yet detailed.

The Challenger M-105 proves that dual 10" woofers in a floor standing speaker can be both powerful and detailed. By placing the tweeter and the midranges in a D'Appolito design and applying four reflex ports the low frequencies harmonize perfectly with the detailed high frequency notes. The M-105 is a perfect choice for a powerful stereo setup or an equally powerful home theatre system.

## M-105

<b>Weight kg (each)</b>	32,9
<b>Finish</b>	Available in Black, Oak, White
<b>Quantity</b>	Sold in pair

**The reliable choice** - The Challenger series has a long tradition and has since the beginning been praised for its unprecedented price/performance ratio - a big, detailed and powerful sound at affordable prices.

**Sturdy and well built** - The walls, the top and the bottom of the cabinet are 18mm MDF with extra internal bracing. A well-built cabinet is key to keep vibrations and unwanted noise to a minimum.

**Dynavoice X-Change** - The Bi-wire, gold plated terminal has the Dynavoice X-change function. This lets you control the upper midrange frequencies, a great way to adjust the sound depending on the room and speaker placement.
